

# CHALLENGER

*Hydraulic specialists - stronger together*

01 September 2018

## **“Universal Hydraulics joins the Challenger Group”**

The Challenger Group company, CFP Hydraulic Systems Limited has purchased Universal Hydraulics Limited and their property on Chesterfield Trading Estate from the previous owners.

Universal Hydraulic has been a hydraulic component stock-holder, manufacturer of hydraulic power units and manufacturer of crane mounted tyre handlers for many years and has established a regular and loyal customer base, predominantly throughout the UK.

This acquisition will assist the Challenger Group to expand into new areas of the hydraulic industry and enhance the power unit manufacturing side of the business that the CFP Hydraulic Systems division already excels in.

CFP Hydraulic Systems will move from Foxwood Road in Chesterfield into the Universal Hydraulics property on Chesterfield Trading Estate over the coming months.

The Challenger Group also has manufacturing facilities in both Dewsbury and Hull. The Dewsbury site has traditionally concentrated its efforts in the manufacture of hydraulic cylinders and hose and fittings. The Hull site are specialist manufacturers of recycling systems, reconditioning systems, conveyors and are agent for SSI Shredding Systems Inc.
